

NOTICE

Please note: the Dick Hollar Landing on the north side of Pipe Lake **will be closed** on **Wednesday and Thursday, September 9 & 10, 2026**, for repairs to the landing.

The landing will not be able to be used on the above dates - no boats will be able to be launched or taken out the lake via the landing on these dates.

There is a small possibility that the landing repair will extend beyond the anticipated work window of Sept. 9-10; in which case the landing would be closed for additional dates between Sept.10 & Sept.15.

Please take the potential extended closure of the Pipe Lake landing into consideration with your boating plans. Please also note that the concrete ramp extension pad will be delivered to the landing parking lot sometime on Sept. 9. As a result, parking at the landing may be limited during this time period.

This repair has been scheduled after the Labor Day Weekend so hopefully that the impact of the landing closure is minimal, and the water level is likely at the summer season low. The repair work needs to be finished before with the WDNR work permit Sept. 15 expiration date.

The repair effort is being jointly sponsored by the Town of Johnstown Township and the Pipe & N. Pipe Lakes Protection and Rehabilitation District.

It is hoped is that this work on the landing will make the lake landing perform safely and smoothly well into the future.

We appreciate your patience while the landing repair is underway.

If you have questions, you may reach out via the Lake District email: pipelakeswi@gmail.com.

Thank you again for your cooperation and understanding.
